OBJECTIVE

Innovative computer science specialist student with hands-on experience in Python, Java, and C with eagerness to learn progressive web apps and front-end development.

EDUCATION

University of Toronto
Honours Bachelor of Science | Computer Science Specialist
2017 – 2022
Admission Scholarship ($2000) - Received an admission scholarship valued at $2000 for my exemplary work in high school

Relevant Courses

- Software Design
- Introduction to the Theory of Computation
- Software Tools and Systems Programming
- Computer Organization
- Data Structures and Analysis
- Introduction to Neural Networks and Machine Learning
- Numerical Methods

SKILLS

Languages – Python, Java, C, HTML, CSS
Other – Git, Lightroom

PROJECTS

UofT Course Code Reddit Bot | Python
Utilized PRAW, the Python Reddit API Wrapper, to create a Reddit bot that comments on user's comments with relevant courses descriptions when called.

Sudoku | Java
Developed puzzle solving and generating algorithms for a Sudoku clone using Java and JavaFX.

Portfolio Website | HTML/CSS
Designed a personal portfolio website using HTML/CSS to showcase my projects and skills.
